EXAMINER'S AMENDMENT

Drawings

An Official Draftsman has approved the drawings.

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Agent Catherine Anne Whealy on June 29, 2004.

In the specification:

A. Page 2, line 4, the term "taken" has been deleted.

B. Page 3, lines 3-6 has been deleted and replaced with the following:

-- Plants of the new Fuchsia can be compared to plants of the cultivar Rose Purple, not patented. In side-by-side comparisons conducted in Venhuizen, The Netherlands, plants of the new Fuchsia differed primarily from plants of the cultivar Rose Purple in the following characteristics:

1. Plants of the new Fuchsia were more uniform than plants of the cultivar Rose Purple.

2. Plants of the new Fuchsia flowered earlier and more continuously than plants of the cultivar Rose Purple.

3. Plants of the new Fuchsia were more tolerant to wind and rain than plants of the cultivar Rose Purple. --.

- C. Page 9, after line 14, the following has been inserted:
-- Filament length: About 6.5 cm.
Filament color: Close to 66A. --.
- D. Page 9, line 19, the pistil length "6.5" has been deleted and replace with -- 8.6 --.
- E. Page 9, line 20, the recitation "Style length: About 5.7 cm." has been deleted.

Reasons for Allowance

The information regarding the cultivar Kiecandipu was described in the Plant Breeder's Right application number 00-2307 filed in Canada on June 21, 2000 and published on November 1, 2000. The printed publication was accessible to the public more than one year prior to filing of this instant application. A publication relied upon as prior art under 35 USC 102(b) must be enabling. The text of the relied upon publications standing alone would not enable one skilled in the art to practice the claimed invention.

When the claim is drawn to a plant, the reference, combined with knowledge in the prior art, must enable one of ordinary skill in the art to obtain or reproduce the plant. See *In re Le Grice*, 301 F.2d 929, 133 USPQ 365 (CCPA 1962). If one skilled in the art could obtain or reproduce the plant from a publicly available source, then a publication describing the plant would have an enabling disclosure.

In the declaration, Applicant states that the claimed plant has not been sold or available to the public anywhere in the world. The printed publication cannot be enabled because the disclosed cultivar has not been propagated or obtained from publicly available materials.

The specification provides as complete a botanical description as reasonably possible of the claimed plant. The completeness of the description is sufficient to distinguish this new plant from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
